

TWINSTOR

The eye-catcher on every terrace

Beside ground anchors, the Twinstor can as an alternative be fixed in flowerboxes with reinforcement profiles.

THE EYE-CATCHER ON EVERY TERRACE

The Brustor Twinstor creates shadow wherever you prefer: with **two ground anchors or freestanding galvanised steel flowerboxes**, this **autonomous awning** is anchored in the garden or on the terrace without attachment to an existing wall or porch. The fabric and the mechanical parts are protected in an optimal way thanks to the two **fully enclosed cassette** casings, guaranteeing a longer life.

The arms are **electrically controlled with a waterproof key switch** or optional remote control. **LED lights** and a **patio heater** operated by remote control are very convenient when you want to enjoy your Twinstor on cooler, darker evenings. With a maximum width of 7 m and a projection of 3 m off each side, a **shadow surface of 42 m²** is created. The Twinstor Elite comes with **71 mm high arms and 4 cables**, causing an even better fabric tension.
